The Middle Class Revolution

Running a mutual fund and being in the investment world for more than 20 years got me in the habit of looking to the future and observing the changes that were coming, and what they would mean for new opportunities. This was necessary to look at where to place money for the prospect of generating above-average returns. It also appealed to my entrepreneurial side of filling a gap that existed because of the opportunities that I was seeing. I would sometimes go into overload, thinking about all the things that could be done to take advantage of potential opportunities.
