The S Curve

On my trip to Canada for the <u>EO</u> Conference, <u>Peter Thomas</u>, who I introduced in the last blog, (founded Century 21 in Canada and took it to 9 billion in sales) spoke to us about the <u>S</u> <u>Curve</u>.

I spent many years in the investment world and back in the early nineties I went thought the <u>Chartered Financial Analyst</u> (CFA) program. We discussed the <u>S curve</u> in depth, which depicts the life cycle of a business. With the S tilted forward a little, you can see how a growing company starts out flat for a bit, then takes strong spurt upward and then levels off and starts to decline. This is the life cycle of most businesses, usually lasting 5 to 7 years. Hang on for a second if you think this may not be relevant to you.
